PROFESSIONAL SUMMARY

Game developer with 4+ years of professional experience across PC, XR, and mobile. Shipped titles on Android, iOS, and Meta Quest — most recently as the sole developer of Baseball X, a physics-driven VR baseball simulator. Strong in gameplay architecture, physics systems, and performance optimization, with experience taking games from concept to launch and maintaining them as live products.

TECHNICAL SKILLS

Engines & XR	Unity 3D, Unity 2D, Unreal Engine, VR, AR, physics systems
Programming	C# (advanced), C++, Java, JavaScript, HTML/CSS
Tools & Practice	Git/GitHub, performance optimization, gameplay architecture, UI design, animation
Platforms	Meta Quest, Android, iOS, Steam, Epic Games

PROFESSIONAL EXPERIENCE

XRev Studios Unity Developer · VR	Jun 2026 — Present
Returned to XRev to continue development of the studio's VR sports titles on Meta Quest.	
Magami Studios Unity Developer · 2D MMORPG	Nov 2025 — Jun 2026
- Drove key architectural upgrades on <i>Breath of Estova</i>, a 2D MMORPG, improving performance, maintainability, and production scalability. - Designed and built robust long-term systems to support continuous live-product growth and stability. - Implemented core gameplay elements, mechanics, and major consumer-facing features.	
XRev Studios Unity Developer · VR	May 2024 — Nov 2025
- Sole developer of <i>Baseball X</i> (Meta Quest): rebuilt bat-ball collision physics from scratch, built the fielding and scoring systems and multiple game modes, and integrated backend accounts and login. - Developed the Baseball X companion app for remote pitch setup, pitch visualization, shot replay, and swing analytics. - Co-developed major systems on <i>Cricket X</i>: the fielding system, physics optimization, and animation work. - Engineered gameplay-analysis features enabling player performance tracking and real-time behavioral feedback.	
Game District Unity Developer · Mobile	Apr 2022 — Apr 2024
- Developed, optimized, and launched 4 mobile titles from concept through release on iOS and Android. - Maintained and refactored legacy codebases, consistently ensuring optimal frame rates and device compatibility. - Collaborated in an agile, multi-developer team using Git/GitHub workflows; contributed to code reviews and technical discussions.	

PERSONAL PROJECTS

- Echo Room VR** — original echolocation puzzle game for Meta Quest (Unity, OpenXR), in development: physically accurate spatial echoes, a custom sonar reveal shader, and microphone-triggered pings.
- Skateboard** — downhill skateboard racing game built solo; physics-driven board control and race events.

TRAINING & CERTIFICATIONS

- Junior Unity Game Development Program — GameTrain** (Dec 2021 — Mar 2022): 350+ hours of intensive game-engine training; Unity Essentials and Junior Programmer pathways.

EDUCATION

University of Agriculture, Peshawar — Bachelor of Computer Science (BCS)	2017 — 2021
